Mission-Driven Federal Technology Modernization

SecurePro Inc. is a Small Disadvantaged Business delivering secure, mission-aligned technology modernization for federal, defense, and regulated-sector organizations. We help agencies modernize cybersecurity operations, cloud platforms, enterprise systems, data environments, DevSecOps pipelines, AI/ML capabilities, and workforce-support systems through secure, scalable, and compliance-driven delivery.

Core Capabilities

Cybersecurity & Zero Trust

Zero Trust architecture, RMF & ATO support, continuous monitoring, FedRAMP, and threat & vulnerability management.

Cloud Engineering & GovCloud Modernization

Secure cloud architecture and migration across AWS, Azure, and GovCloud, with cloud-native modernization, resilience, and automation.

AI/ML & Data Analytics

AI/ML model development and deployment, predictive analytics, NLP and computer vision, and data engineering and visualization.

DevSecOps & Platform Engineering

CI/CD pipeline automation, Infrastructure-as-Code, secure SDLC, container and Kubernetes platforms, and release management.

ERP & Enterprise Systems Modernization

Cloud-native ERP across financials, logistics, and HR, with process automation, integration, and real-time reporting.

Workforce & HCM Modernization

HCM modernization support, workforce analytics and readiness reporting, decision-support dashboards, and compliance automation.

Differentiators

- Federal technology modernization across cyber, cloud, AI, DevSecOps, ERP, and workforce systems.
- Cleared personnel and a Secret facility clearance (FCL).
- Security- and compliance-first engineering for regulated environments.
- Cross-disciplinary teams across cybersecurity, cloud, AI/ML, data, ERP, and DevSecOps.
- Small-business agility with enterprise-grade technical depth.
